

Feasibility counts for SARS-CoV-2-related codes in CPRD primary care data

April 2021

Background

CPRD primary databases

The Clinical Practice Research Datalink (CPRD) holds longitudinal primary care EHR on 50 million patients, with a median 10 year follow up. CPRD data cover 25% of the UK population (over 16 million patients) currently registered at a network of 1 in every 5 GP practices across the UK, who share patient data with CPRD on a daily basis. CPRD collects fully coded patient electronic health records from GP Practices using the Vision® or EMIS® software systems. Due to some differences in structure and clinical coding in these two systems, these data are provided as two separate primary care databases at present with accompanying metadata and advice to enable researchers to make study-specific decisions on how best to pool these data. CPRD GOLD contains data contributed by practices using Vision® software. CPRD Aurum contains routinely collected data from practices using EMIS Web® electronic patient record system software. Both research databases are updated monthly. The counts in this report are based on the April 2021 database builds of CPRD Aurum and CPRD GOLD.

Context

The novel coronavirus and disease that it causes (COVID-19) are an immediate focus for many research groups globally. CPRD primary care data are a potentially valuable resource to support this research. Feasibility counts to understand whether and how codes relating to SARS-CoV-2 are being recorded in primary care are the first step in establishing the research potential of CPRD data on this topic. The counts in this report should only be presented in the context of a feasibility count within a given data source and/or database (e.g. CPRD GOLD or CPRD Aurum). It would not be appropriate to present these in a publication as incidence or prevalence counts or to use these for surveillance purposes.

Summary counts

The CPRD GOLD April 2021 build includes data from 20M patients, of which 3.2M are currently registered and acceptable¹. A total of 964 GP practices have contributed data to CPRD GOLD of which 408 are currently contributing practices.

The CPRD Aurum April 2021 build includes data from 39.7M patients, of which 13.3M are currently registered and acceptable¹. A total of 1,489 GP practices have contributed data to CPRD Aurum of which 1,373 are currently contributing practices.

The feasibility counts are based on a cohort of patients who have at least one relevant COVID-19 code in the period **02/12/2019 – 31/03/2021** and within their registration period. The patient registration period starts at the patient registration date with the practice and ends at the earliest of the patient transfer out date (de-registration), and the practice last collection date.

1,357,066 events related to SARS-CoV-2 were recorded in CPRD GOLD in the period 02/12/2019-31/03/2021. Each coded event is counted, irrespective of the distance between consecutive entries. These relate to **536,901** unique patients.

10,119,851 events related to SARS-CoV-2 were recorded in CPRD Aurum in the period 02/12/2019-31/03/2021. Each coded event is counted, irrespective of the distance between consecutive entries. These relate to **3,875,225** unique patients.

Table 1 presents numbers of unique events and patients stratified by gender.

Table 1. SARS-CoV-2 codes by gender

Gender	CPRD GOLD events	CPRD GOLD patients	CPRD Aurum events	CPRD Aurum patients
Male	487,852	231,705	3,719,371	1,716,763
Female	869,214	305,196	6,400,480	2,158,462

¹ Acceptable patients are identified within the CPRD using pre-defined criteria to assess the research quality of a patient health record

Table 2 presents numbers of unique events and patients stratified by age group. Age at event is calculated as the difference between the year of the event and the year of birth recorded in the CPRD primary care data.

Table 2. SARS-CoV-2 codes by age group

Age Group	CPRD GOLD events	CPRD GOLD patients	CPRD Aurum events	CPRD Aurum patients
0-18	151,048	91,934	1,156,673	687,739
19-49	645,567	253,574	5,059,503	1,939,954
50-59	234,424	80,252	1,684,608	544,102
60-69	143,027	50,179	1,004,890	331,906
70-79	79,411	32,237	521,659	197,403
80+	103,589	28,725	692,518	174,121

Table 3 presents numbers of unique events and patients across the period stratified by practice nation.

Table 3. SARS-CoV-2 codes by practice country

Practice country	Number of currently contributing CPRD practices (n= 1764) ²	Regional coverage of CPRD practices ³	All events (CPRD Aurum + CPRD GOLD)	Patients (CPRD Aurum + CPRD GOLD)
England	1,411 (80%)	21.5%	10,425,464	4,031,121
Northern Ireland	52 (2.9%)	15.5%	18,601	10,866
Scotland	197 (11.2%)	19.7%	481,993	174,871
Wales	104 (5.9%)	24.8%	550,859	195,268

Table 4 presents numbers of unique events and the associated number of unique patients stratified by code type (see appendix 1). The number of patients provided is the number of unique patients within each stratification (code type). The same patient may therefore be present in two or more stratifications.

Table 4. SARS-CoV-2 codes by code type

Code Type	CPRD GOLD events	CPRD GOLD patients	CPRD Aurum events	CPRD Aurum patients
Possible	41,360	34,129	371,222	217,832
Tested	1,138,301	425,318	7,097,908	3,006,760
Diagnosis	139,892	100,100	1,027,928	646,506
Advice	37,513	32,702	1,622,793	603,638

Notes:

- The code lists used (see appendix) include both emergency codes created in response to the novel coronavirus and more general coronavirus codes. Though there is a risk of misclassification with the more general codes, these are likely to have been used until the specific codes were made available.
- The CPRD patient data quality indicator, the ‘acceptable’⁴ flag has not been applied. This allows the inclusion of temporary patients.
- The counts provided have been de-duplicated. Patients in practices that have migrated software system from Vision® to EMIS® have been excluded from the CPRD GOLD counts.

² Numbers correct at release of January 2021 database builds

³ Based on currently contributing practices and national practice numbers in May 2020.

⁴ Acceptable patients are identified within the CPRD using pre-defined criteria to assess the research quality of a patient health record

- Due to CPRD's small cell policy, patient counts with fewer than 5 observations have been suppressed.

Appendix 1
CPRD GOLD SARS-CoV-2 code list

medcode	Read code	Term	Code Type
114771	4J3R100	2019-nCoV (novel coronavirus) detected	Tested / Diagnosis
114769	4J3R200	2019-nCoV (novel coronavirus) not detected	Tested
114770	4J3R.00	2019-nCoV (novel coronavirus) serology	Tested
114760	8CAO100	Advice given about 2019-nCoV (novel coronavirus) by telephone	Advice
114754	8CAO.00	Advice given about 2019-nCoV (novel coronavirus) infection	Advice
114891	A7y0000	Coronavirus as cause of dis classified to other chapters	Diagnosis
114731	65PW.00	Coronavirus contact	Possible
50068	A795.00	Coronavirus infection	Diagnosis
91124	43jS.00	Coronavirus nucleic acid detection	Tested
109154	43jS000	Coronavirus nucleic acid detection assay	Tested
110951	43jS100	Coronavirus ribonucleic acid detection assay	Tested
114765	A795100	Disease caused by 2019-nCoV (novel coronavirus)	Diagnosis
114764	65PW100	Exposure to 2019-nCoV (novel coronavirus) infection	Possible
113745	1JX..00	Suspected coronavirus infection	Possible
114766	1JX1.00	Suspected disease caused by 2019-nCoV (novel coronavirus)	Possible
114753	9N31200	Telephone consultation for suspected 2019-nCoV (novel coronavirus)	Possible
114762	AyuDC00	[X]Coronavirus infection, unspecified	Diagnosis
115315	AyuKL00	[X]Coronavirus/cause/diseases classified to other chapters	Diagnosis
